

מכללת הרצלג – גוש עזיזו

11

A detailed topographic map of the Jordan River area, likely a 1:100,000 scale map. The map features numerous contour lines indicating elevation changes, particularly along the river's course. Stream networks are depicted as lines with arrows, showing the flow direction. Several geographical features are labeled in Hebrew, including 'הַר אֶלְעָזָר' (Mount Elazar) at the top center, 'הַר הַמִּזְרָח' (Mount of the East) on the right side, 'גְּבֻרָה' (Gibeah) near the center, 'גְּדֹלָה' (Gedola) further down the river, 'גְּבַעַת' (Gibeat) on the left bank, and 'גְּבַעַת' (Gibeat) on the right bank. The map also shows 'צָבָא' (Zabao) and 'צָבָא' (Zabao) on the far left. The Jordan River itself is shown flowing from the north towards the south. The entire map is framed by a thick black border.

This is a high-contrast, black-and-white photograph of a historical map or chart. The map depicts a river system, likely the Yellow River (Huang He), with its major tributaries. Several locations along the river are labeled with Chinese characters. In the upper left, there is a label '中游' (Middle Reach). To the right of the main river, labels include '河曲' (Huang He曲), '汾水' (Fen Shui), '渭水' (Wei Shui), '洛水' (Lo Shui), '淇水' (Qi Shui), '濮水' (Pi Shui), '睢水' (Sui Shui), '汝水' (Yu Shui), and '颍水' (Ying Shui). On the far right, there is a large, irregularly shaped area labeled '淮水' (Huai Shui). The map uses a grid system for orientation, with horizontal and vertical lines intersecting across the entire area. The terrain is represented by different shades of gray, and the river network is shown in a dark, winding line.
